

### SynQro supervision system features:

- Organization of official competitions, thanks to simple, intuitive software
- Real-time management of shooting activities on the range
- Live screen projection of shootings and matches
- Dynamic, attractive and interactive training sessions

### Training

- Shooting range supervision from a central computer
- Parallel allocation of activities for: one target, one target group, several target groups
- Export of results for all activities, in PDF and/or CSV format

### Official competitions

- Import list of participants
- Control of all targets from one computer
- Centralized control of all parameters, according to ISSF standards or customized choices (number of rounds, number of shots, trial times, match times, target settings, etc.).
- Management of all phases of the competition
- Management of exceptions and unforeseen events (target changes, penalties, refereeing decisions, etc.)
- Share results on a large screen (TV screen and/or projector)
- Export of competition results: match sheets, results in CSV format for integration in databases

### SynQro supervision configuration

- WiFi network with high-performance router
- Optional Ethernet cabling (star network)
