

SynQro

Software for managing shooting ranges or official competitions

Features of the SynQro target management system

- Autonomous organization of official competitions, thanks to a simple and intuitive software
- Real-time management of shooting activities on the range
- Live projection on screen or TV of the competition
- Dynamic, attractive and interactive training sessions

Training

- Management of the shooting range from one central computer
- Assignment of activities in parallel for: one target, one group of targets, several target groups
- Export of results for all activities, PDF and/or CSV format.

Official competitions

- Import and Export of Start Lists (ISIS connector)
- Management of the competition in all its phases :
 - Management of interventions (penalties, additional time...)
 - Management of exceptions and contingencies (change of target, penalties, Judging decisions, etc.)
- Tool for judges' pre-competition verification of target accuracy
- Management of several matches simultaneously
- Screen display customization, recommended configuration: one TV screen and/or projector for up to 10 targets
- Guaranteed operational safety due to redundancy of data backup
- Centralized control of all parameters, according to ISSF standards or personalized choices (number of series, number of shots, trial time, match time, target settings, etc.)
- Printing match sheets by targets or target group

SynQro

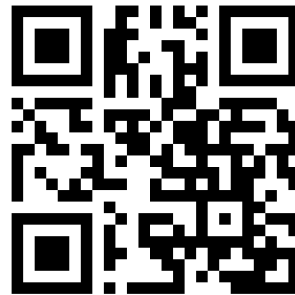

Software for managing shooting ranges or official competitions

SynQro Software Management Configuration :

- Wi-fi network with high performance router
- Recommended RJ45 Ethernet Cabling

Option :

-Remote Judging
